## Science Milestones- Progression Map across Primary Phase

Basic understanding equates to 'Paddling', Advancing understanding is 'Snorkelling' and Deep or Embedded understanding is 'Diving'.

Another pictorial description is shown below. The milestones are organised across three two year phases, in Primary school, Years 1 & 2, 3 & 4 and 5 & 6. In the first year of any two year phase, most children will be working on the basic knowledge building phase, with only the most able moving into advancing. Similarly, the least able children may still be working at basic understanding, during the second year of any phase.

	Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.	Report findings from enquiries, including oral and written explanations of results, explanations involving causal relationships, and conclusions.	
	Use results to draw simple conclusions and suggest improvements , new questions and predictions for setting up further tests.	Present findings in written form, displays and other presentations. Use test results to make predictions to set	
	Identify differences, similarities or changes related to simple, scientific ideas and processes.	up further comparative and fair tests. Use simple models to describe scientific ideas, identifying scientific evidence that

Investigate living things This concept involves becoming familiar with a wider range of living things, including insects and understanding life processes.	Explore and compare the differences between things that are living, that are dead and that have never been alive. Identify that most living things live in habitats to which they are suited and describe how different habitats provide for	Recognise that living things can be grouped in a variety of ways. Explore and use classification keys. Recognise that environments can change and that this can sometimes	<ul> <li>Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird.</li> <li>Describe the life process of reproduction in some plants and animals.</li> <li>Describe how living things are classified into broad groups according to common</li> </ul>

	the basic needs of different kinds of animals and plants and how they depend on each other. Identify and name a variety of plants and animals in their habitats, including micro- habitats. Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.	pose dangers to specific habitats.	• Give reasons for classifying plants and animals based on specific characteristics.
Understand evolution and inheritance This concept involves understanding that organisms come into existence, adapt,	<i>Identify how humans resemble their parents in many features. Y2</i>	<i>Identify how plants and animals, including humans, resemble their parents in many features.</i>	Recognise that living things have changed over time and that fossils provide information about living things that

	change and evolve and become extinct.		<ul> <li>Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.</li> <li>Identify how animals and plants are suited to and adapt to their environment in different ways.</li> </ul>	<ul> <li>inhabited the Earth millions of years ago.</li> <li>Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.</li> <li>Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.</li> </ul>
Chemistry	Investigate materials This concept involves becoming familiar with a range of materials, their properties, uses and how they may be altered or changed.	Y1 Au2: Distinguish between an object and the material from which it is made. Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water and rock.	Rocks and Soils Compare and group together different kinds of rocks on the basis of their simple, physical properties. Relate the simple physical properties of some rocks to their formation (igneous or sedimentary).	Compare and group together everyday materials based on evidence from comparative and fair tests, including their hardness, solubility, conductivity (electrical and thermal), and response to magnets. • Understand how some materials will dissolve in liquid to form a

Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature. Key vocab √	including changes associated with burning, oxidisation and the action of acid on bicarbonate of soda.
Physics	Understand movement, forces and magnets This concept involves understanding what causes motion.	Notice and describe how things move, using simple comparisons such as faster and slower. Compare how different things move.	Y3 Su1: Compare how things move on different surfaces. Notice that some forces need contact between two objects, but magnetic forces can act at a distance. Observe how magnets attract or repel each other and attract some materials and not others.	Magnets• Describe magnets as having two poles.• Predict whether two magnets will attract or repel each other, depending on which poles are facing.ForcesY5 Au 1: Explain that unsupported objects fall towards the Earth because of the force of gravity acting between

Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials.	the Earth and the falling object. Identify the effect of drag forces, such as air resistance, water resistance and friction that act between moving surfaces.
Describe magnets as having two poles. Predict whether two magnets will attract or repel each other, depending on which poles are facing. Tiered vocab √	Describe, in terms of drag forces, why moving objects that are not driven tend to slow down. Understand that force and motion can be transferred
	through mechanical devices such as gears, pulleys, levers and springs. EXPERIMENT?? Understand that some mechanisms including levers, pulleys and gears, allow a

Understand light	Observe and name a	Y3 Au2: <mark>Recognise</mark>	greater effect. Tiered vocab ✓ Y6 Su1:
and seeing This concept involves understanding how light and reflection	<i>variety of sources of light, including electric lights, flames and the Sun, explaining</i>	that they need light in order to see things and that dark is the absence of light.	Understand that light appears to travel in straight lines.
affect sight.	<i>that we see things because light travels from them to our eyes.</i>	Notice that light is reflected from surfaces.	Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light
		Recognise that light from the sun can be dangerous and that there are ways to protect their eyes. Recognise that shadows are formed when the light from a light source is	into the eyes. Y3 Au2: Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them, and to predict the size
		blocked by a solid object. Find patterns in the way that the size of shadows change. Key vocab √	of shadows when the position of the light source changes. Explain that we see things because light travels from light
		-,	sources to our eyes or from light sources to

			objects and then to our eyes.
Investigate sound and hearing This concept involves understanding how sound is produced, how it travels and how	<i>Observe and name a variety of sources of sound, noticing that we hear with our ears.</i>	Y4 Su1: Identify how sounds are made, associating some of them with something vibrating.	Y4 Su1: Find patterns between the pitch of a sound and features of the object that produced it.
it is heard.		Recognise that vibrations from sounds travel through a medium to the ear.	Find patterns between the volume of a sound and the strength of the vibrations that produced it.
			Recognise that sounds get fainter as the distance from the sound source increases.
Understand electrical circuits This concept involves understanding circuits and their role in electrical applications.	Identify common appliances that run on electricity. • Construct a simple series electrical circuit.	Identify common appliances that run on electricity. Construct a simple series electrical	Y6 Sp1: Electricity: Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.
		circuit, identifying and naming its basic parts, including cells, wires,	Compare and give reasons for variations in how components function,

		<ul> <li>bulbs, switches and buzzers.</li> <li>Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery.</li> <li>Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.</li> <li>Recognise some common conductors and insulators, and associate metals with being good conductors.</li> </ul>	including the brightness of bulbs, the loudness of buzzers and the on/off position of switches. Use recognised symbols when representing a simple circuit in a diagram.
Understand the Earth's movement in space This concept involves understanding what causes seasonal	Observe the apparent movement of the Sun during the day.	<i>Describe the movement of the Earth relative to the Sun in the solar system.</i>	Y5 Au 2: Describe the movement of the Earth, and other planets, relative to the Sun in the solar system.

changes, day and night.	Y1 Au1: Observe changes across the four seasons. Observe and describe	• <i>Describe the movement of the Moon relative to the Earth.</i>	Describe the movement of the Moon relative to the Earth. Describe the Sun, Earth and Moon as
	weather associated with the seasons and how day length varies. Key vocab √		approximately spherical bodies. Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky. Tiered vocab √
