

# Special Project

## Year 5

After half term, we will be starting a new Science topic: **Life cycles**.

We want you to find out about this topic at home and complete the task below, to showcase what you have learnt. This can be done by creating a booklet, poster, model, display, Power Point or video.

You will need to bring in your completed project by Monday 10<sup>th</sup> June 2024, which will be displayed in the school.

The best projects will be featured on the school website!

### Your task:

Research and produce a project that you can present to your class based on the Life cycle of an Insect or Amphibian of your choice.

Some topic ideas are:

- What type of habitat supports their growth
- What changes do they go through?
- What scientific language describes their changes
- Does climate change impact their development?

Remember, the project needs to be eye-catching and attractive!
