

Year 4

Special project

In the next half term, Year 4 will be starting a new Science topic:

Living things and their habitats

During the half term holiday, we would like you to find out about this topic at home and complete the task below to showcase what you have learnt. You can show what you have learnt by creating a booklet, poster, model, display, PowerPoint or video.

Next term, you will need to bring in your completed project, which will be displayed in the school. **The best projects will feature in the school newsletter!**

Your task:

Research and produce a project that you can present to your class based on a particular habitat. This may include:

aquatic, desert, forest, grassland or tundra.

Think about the climate, which plants grow; if any and which animals live there. Remember to add pictures as well as information.

Challenge: Which class are your animals/creatures in your chosen habitat?

Either: amphibians, mammals, reptiles, birds, fish, invertebrates.

Your special project is due:

Monday 11th November 2024
