

Special Project

Year 2

Science homework challenge: Habitat

Our next unit for science is learning about animals, including humans. To help prepare for this topic we would like you to research and create a poster or diorama about an animal's habitat.

In your projects please identify:

The group your animal belongs to (mammals, reptiles, fish, birds, amphibians).

Habitat - where the animal lives.

Diet - what the animal likes to eat and if it's an omnivore, carnivore or herbivore.

What does the animal do to survive?

Projects are due back Friday 17th March 2025

Remember to present your project in a way that will be eye-catching and attractive! There will be a prize for the best piece of work!
