

Special Project

Autumn 2 - Year 1

Next half term, Year 1 will be starting an exciting new curriculum topic: ***Seasonal Changes!***

Over the next week, we would like you to help your child find out more about this topic at home and complete a special project to showcase what they have learnt.

Your child can present their learning in any creative way they choose, for example, a booklet, poster, or model

Once completed, please bring the project into school. The children's work will be displayed proudly around the school, and the most creative projects might even be featured on the school website!

Your Task:

Create a project all about The Weather.

You could:

- Explore different types of weather and climates around the world.
- Keep a weather diary for the week to observe how the weather changes.
- Make a model or craft showing your favourite type of weather.
- Research how weather affects people, animals, and plants.

Please ensure all projects are handed in by **Friday 7th November 2025**.

We can't wait to see your imaginative and creative work!

The Year 1 Team
